Title: Risk

Description: This is a PC/ Mac game that allows users to play risk against each other. We will allow users to log into a server and connect them to others trying to play. The app will connect computers and allow them play a game of risk. A stretch goal is to allow the user to play against a machine and to make it 3d.

Platform/Environment: PC/ MacOsx based using SDL and integrated with MySQL on the server side.

Languages:

Language	Nic Broeking	Josh Rahm
C++	Expert	Guru
MySql	Intermediate	Expert

Functionality:
Users can Log In
Users can Register
Users can Search for Games
Users can start games
Users can play games

Stretch Goals:
3D Map
AI opponent
